Director Benton Addresses MOPH Conference

Director Benton was invited to speak at the Military Order of Purple Heart’s (MOPH) 86th National Conference in Spokane, Washington on August 1, 2018. The MOPH organization was formed in 1932 and is composed exclusively of Purple Heart recipients, and it is the only veterans service organization comprised strictly of “combat” veterans. The Director started his presentation by telling the attendees that, “I am always moved and impressed when I reflect upon your mission—to foster an environment of goodwill and camaraderie among combat wounded veterans, promote patriotism, support necessary legislative initiatives, and most importantly, provide service to all veterans and their families”. He said that as the Director of the Selective Service he is charged with ensuring that the agency is ready to respond to a national emergency rapidly, fairly, and equitably. Director Benton stressed the importance of the registration requirement and noted that it is not only the law but is also a civic duty. The Director discussed the many federal and state benefits linked to registration and spoke about how not registering can have a negative impact on a young man’s future. Director Benton told the audience that he believes the most successful avenue to increase registration awareness is through a young man’s parents, grandparents, friends, teachers, and veterans. Many members expressed an interest in helping Selective Service and volunteering by applying to be a Local Board Member, a State Resource Volunteer or through the agency’s Speakers Bureau. Director Benton offered his heartfelt thanks to the MOPH for their interest, willingness, and dedication in helping America’s young men retain benefits linked to the registration requirement they would otherwise lose by failing to register. The agency has many volunteer opportunities available and welcomes the support. If you are interested in becoming a local board member or a State Resource Volunteer please contact us at information@sss.gov.
